PUBLISHER'S MESSAGE

There is a great saying that talks about how we cannot predict the future, but we have the ability and opportunity to create it. The task of navigating the unknown of the future has been a recurring challenge for most of us, whether in the business world or in our personal lives. But we must constantly choose to face it and find ways to place ourselves in the best positions to move forward and shape our futures for the better.

What is crucial for this to happen is a guiding mission and principle to keep you steady and anchored amidst the surrounding turmoil. For us in DPC and the Philippine Yellow Pages, it is our commitment to helping local businesses grow and succeed through user-friendly, cost-efficient, and effective platforms, tools and services. Guided by this, we are driven each day to learn, evolve, and find creative means to service our partner's ever growing and changing business needs.

The challenge is furthered by the fact that we service thousands of partners that belong to different industries, locations, and market-factors. This is why we take pride in making sure that we only make or use products or services that are sensitive to these, and are customized to what really works. This is because we are a partner focused organization. We always make sure to listen to our partners, and we work with them to create mutually beneficial and sustainably growing partnerships. It may be daunting to try and service such a wide range of partners, but this is the challenge that we have been taking on for the past 60 years, and one we will continue to overcome in the years ahead.

“THIS IS BECAUSE WE
ARE A PARTNER FOCUSED
ORGANIZATION.”

What becomes crucial then is our suite of products and services. The goal is to find and match them to the wide-range of partner needs. To share some examples: we have partners in high investment industries who really value our flagship Yellow Pages print book and online directories as it always drives them to only legitimate and verified businesses. For our partners that need help in capturing potential leads and inquiries, we have a hotline to assure someone will capture a call to them 24/7.

Then there are partners that want to showcase their huge inventories. We work with these partners to create modern and easy-to-navigate online catalogs for these on their professionally designed website. We can even go a step-further and enable these websites with e-commerce functionality. We also have partners who are focused on awareness generation, and reaching new audiences. For these partners, we enable them to reach these audiences through our years of expertise on partnering with Google and using Facebook's ad platform, to create effective ads that give the best return on their investments.

These are just some examples of how we answer and fulfill the needs of our partners through our services. It all goes back to our guiding principle, which is to find ways to help in a way that won't burden our partners, but empower them. This starts by actively listening to them and their needs. All of recommendations and ideas start from the needs of the Filipino business owner. While we know that these will always change as the world around us changes, we continue to be committed and driven by this challenge. We hope to be able to share this strength and drive with our Filipino business partners, to allow them to also weather these storms and changes. As it is only when our partners grow, do we feel that we grow. Our commitment to them will never change and never waver. Though this, we hope it allows us and our partners to more easily create the future we all hope for and deserve.
